

Call for International Solidarity with the Federation of General Workers Myanmar

Since the military dictatorship was re-established in Myanmar on February 1, 2021, violence and oppression are a daily occurrence.

Among others the working conditions have become even worse than they already were before the coup. Several unions and NGOs have been declared illegal, like the Federation of General Workers Myanmar (FGWM), whom we have been working with for years.

Despite the hardships FGWM keeps organising safe houses for their members in hiding, finances trainings and educational projects in the field of labour, and supports workers to get organised at their workplaces. At the same time they continue to struggle against the fascist regime, fight for a new constitution and the liberation of all political prisoners.

Those activities cost money! Money the federation currently does not have. But we want to stand by their side. With your contribution you assist the work of the FGWM and therefore directly workers who have joined the resistance.

Dare to fight - Dare to win!

Check out firefund.net/fgwmsolidarity to find out how you can contribute.
